

“ I found the whole process from ordering to delivery excellent.

Great initial advice on the modular system that best suited us, updated regularly on the manufacture and delivered in great time for rehearsals and final school performance.

As Site Manager at a busy school, the site team and I have been able to put the stage together and take it down in super quick time. The children have had great use of it already and most importantly, the Head teacher is extremely impressed with its design.

We shall get a huge amount of use from this stage system and hope to add to it in the future. ”
